About IIPA

Indian Institute of Public Administration Is an institute of eminence and excellence for enhancing the frontiers of knowledge in public policy and governance through applied research and education as well as training of administrators to serve the people of India. Enhancing leadership and

managerial qualities on the one hand and developing a service-orientation on the other are the thrust areas of the Institute's education and training activities. Its faculty is involved with research work mainly to simplify procedures and suggest policy changes to ensure improved delivery of public services. For more details, please visit: iipa.org.in

About the Program

Ministry of Tribal Affairs (MoTA) is providing Scholarship under the National Fellowship Scheme to 750 tribal students and National Overseas Scheme to 20 students. MoTA has entrusted Indian Institute of Public Administration (IIPA), New Delhi, being one of the Centre of Excellence (CoE), with the task to assess and strengthen training needs and capacity building of such scholars and select 500 most talented scholars from the Tribal Talent Pool of Doctoral fellows. IIPA will conduct various programs to improve the quality of research so as to enable the Doctoral scholars to participate in various research and evaluation activities undertaken by MoTA at Central and State levels. The program will also identify scholars for their entrepreneurial skills and capacity. The selected students will also be given option to act as a mentor for the upcoming tribal students who have interest in research activities. IIPA will also develop Alumni for such talent. Under Tribal Talent Pool scheme, Mo TA is compiling information from approx. 5000 Research

Scholars who are enrolled in PhD since 2011. Mo TA has also identified few nodal Universities/Institutes for partnership in this program for proper coordination and implementation of the scheme. However, any University can volunteer to actively participate in the program. IIPA plans to organize a series of workshops in Delhi and at Regional headquarters after discussion with these Universities/Institutes. The first such workshop is planned to be organized in New Delhi by IIPA which will invite all students studying in Delhi NCR Region.

The workshop will be on the Quantitative and Qualitative research methodology and Field Survey Methods. The workshop aims to orient the research aptitude and analytical skills of the scholars. It will impart the scholars with basic concepts, techniques and Skills in qualitative and quantitative data collection and report writing. The Scholars will get an opportunity to learn data analysis through the application of software like SPSS, STATA and R etc. There will also be field survey using CAPI technology, which will be integral part of the workshop.
